PROFESSIONAL SUMMARY

Cybersecurity-focused IT professional and Information Technology & Cybersecurity student at Aurora University (expected 2028) with hands-on experience securing infrastructure, preventing threats, and managing IT operations. Proficient in Java, Python, Docker, and Git. Bilingual in English and Spanish.

SKILLS

Security & Compliance: Cybersecurity best practices, MFA deployment, Password management systems, Endpoint protection, Phishing prevention, Vulnerability assessment, Threat identification, Malware prevention, Security policy enforcement
Networking: IPv4 classful and classless subnetting (CIDR), Subnet masks, Network/broadcast/usable host calculations
Infrastructure & DevOps: Docker containerization, Git version control, Cisco Packet Tracer, System administration, MariaDB, MySQL, Liquibase migrations, Linux, Windows Server
Programming & Development: Java (Spring Boot), Python, JavaScript, C++, RESTful APIs, Spring Data JPA, MediaPipe, Machine Learning (Random Forest)

EXPERIENCE

IT Generalist & Security Administrator 2022 – Present
JG Swimming Pools Inc *Oswego, IL*

- Implemented MFA deployment, password management, and security policy enforcement across all company devices.
- Deployed and managed endpoint protection using AVG antivirus and executed regular malware prevention protocols.
- Conducted security awareness training on phishing, social engineering, and attack vectors to reduce vulnerability exposure.
- Performed endpoint hardening, system patching, and vulnerability identification to maintain secure infrastructure.
- Managed device setup, network configuration, and infrastructure including routers, printers, and networked systems.

Backend Engineer Intern Summer 2025
Garden & Prairie Tech Group LLC *Batavia, IL*

- Built secure backend infrastructure using Java 23 and Spring Boot, applying input validation and security best practices throughout development.
- Developed and documented RESTful CRUD endpoints with clean separation between data and domain layers.
- Integrated MariaDB with Spring Data JPA for data persistence and managed database migrations using Liquibase.
- Deployed containerized applications using Docker for reproducible builds and consistent deployment across environments.

Customer Service Manager 2022 – 2025
Fossil *Aurora, IL*

- Managed point-of-sale operations, inventory organization, and online order fulfillment.
- Resolved customer issues and troubleshot point-of-sale system problems in a fast-paced retail environment.
- Trained and mentored new team members on store systems and customer engagement best practices.

PROJECTS

Phishing Email Alert Chrome Extension September 2026

- Published Chrome extension detecting phishing emails via JavaScript pattern recognition and link analysis.
- Detects 10+ attack types including typosquatting, URL mismatches, IP-based links, URL shorteners, suspicious subdomains, and credential theft.
- Implemented email content scanning, visual threat alerts, popup interface, and local data storage.
- GitHub: github.com/JaimeGar4816/Phishing-Email-Alert | Store: chromewebstore.google.com/detail/phishing-email-alert/emllmbolhhnkgbjdogciijhbfeinfcdc

Real-Time ASL Recognition and Motion Gesture Tracking System November 2025

- Built an AI-powered ASL recognition system using Python, MediaPipe, and Random Forest ML on a custom 63-feature dataset.
- Implemented real-time hand tracking and gesture recognition for all 26 ASL letters with motion-path detection for J and Z.
- GitHub: github.com/JaimeGar4816/asl-vision-translator

EDUCATION

Aurora University
Bachelor of Information Technology & Cybersecurity. *Expected May 2028*
Relevant Coursework: Enterprise Networking, Operating Systems Administration, Cybersecurity Foundations

Waubonsee Community College
Associate of Computer Science. *2025*
